

DELIVERING IMPARTIAL MICROBIOLOGICAL RESULTS

WHO WE ARE

BioLabTests are a highly skilled microbiological testing company. Established in 2014 with an initial focus on antimicrobial product testing, we have since evolved to support microbiological projects with a comprehensive test portfolio.

BioLabTests microbiologists have experience in environmental microbiology, medical microbiology, molecular biology and microbiological research. BioLabTests offer a wide range of methodologies and testing techniques - either bespoke to your project or based on standard principles.

HOW WE CAN SUPPORT YOU

Our test portfolio includes the measurement of microbial activity, the identification of bacteria and the detection of fungi to determine the resistance of material to mould growth.

Project examples include but are not limited to:

Product Testing

Hygiene Monitoring

Bespoke Research

Hygiene Audit Support Services

WE WOULD LIKE TO HEAR FROM YOU

YOUR MICROBIOLOGY PARTNER

OUR CAPABILITIES EXPLAINED

Product Testing | Helping to guide your product performance claims

BioLabTests can test your products to recognised standards such as ISO22196/ JIS Z 2801 and ASTM E2149 to establish the presence of microbes on material or the antimicrobial performance of material. Our product testing service is applicable to any organisation with concerns about microbial contamination of their products or to measure the antimicrobial performance of a competitor's products.

Hygiene Monitoring | Tailored monitoring of processes, products and environments

By recording and/or monitoring microbial levels in a specified product and/or environment, BioLabTests can provide you with an indication of hygiene levels at any facility. This can be on a one-off, repeated or contractual basis. For any organisation concerned with hygienic practices or processes, our service can help solve a specific microbial contamination problem or to provide evidence of compliance to audit or ISO procedures.

Bespoke Research | Uniquely flexible to serve your requirements

BioLabTests team of trained microbiologists can undertake any unique or exploratory research projects to resolve concerns, answer questions or provide you with data for marketing or other purposes. BioLabTests will provide you with a comprehensive set of valuable data based on your specific requirements.

Hygiene Audit Support Services | Ensuring you pass audits with flying colours

BioLabTests audit support services include regular sampling and analysis to ensure you are meeting legal requirements and that you are in a position to pass hygiene focused and GMP audits. This would benefit any organisation with a responsibility to maintain hygiene, whether it is internally or externally implemented as a requirement. BioLabTests will help you identify any potential hygiene issues caused by microbial contamination, enabling you to take corrective action when appropriate.
